### **DETAILED ACTION**

1. Claims 1-18 are allowed.

### **REASONS FOR ALLOWANCE**

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the following limitation: 'a communication stack to communicate with another apparatus within the data processing system over a point-to-point interconnect, the communication stack having a transaction layer, a data link layer, and a physical layer, the transaction layer to transmit a plurality of packets to the another apparatus in serial over the point-to-point interconnect...' as recited in independent claim 1 and similarly recited in independent claims 7 and 13.

The remaining claims 2-6 and 8-12 comprise dependent claims, thus these claims are patently distinct over the art of record for at least the above reasons.

The examiner agrees with the applicants' remarks, filed on September 10, 2004, page 7 lines 1-15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### **CONCLUSION**

3. The prior art made of record and not relied upon is considered pertinent to Applicant's disclosure.

A. Ajanovic et al. (U.S. Pat. No. 6,691,192 B2) discloses an enhanced general input/output architecture and related methods for establishing virtual channels therein;

B. Ishibashi (U.S. Pat. No. 6,694,440 B1) discloses a computer, network controller, and system and remote activating method using the computer and controller; and

C. Brune et al. (U.S. Pat. No. 6,622,187 B1) discloses a method for pre-processing data packets.
